

Dear Patient,

Welcome to Boling Vision Center. We are pleased you have chosen us to provide your eye care. We will strive to meet your needs with integrity, compassion, and excellence.

A comprehensive eye exam is a very valuable aspect of medical care. We provide a broad range of services, designed to optimize vision and preserve the health of your eyes. We will perform tests, such as a refraction, that will enable us to make glasses for you in the best possible prescription. We also screen for many ocular diseases, such as glaucoma and macular degeneration. We will be evaluating the effect on your eyes of any hypertension, diabetes or other systemic diseases. Should any problems be discovered, please be assured we will provide the best care available.

Plan to spend an average of two hours with us on your first visit. The exam may be longer if the need for special testing is discovered. After dilating drops are instilled, a waiting period is required to allow the eyes to fully dilate. The doctor will then perform a thorough exam. If you have any concerns about your ability to drive while dilated, please bring a driver.

Please bring a list of your prescription and over-the-counter medications and dosages, to your appointment. Bring your insurance card as well as your latest pair of glasses, sunglasses and information about your contacts if you are a contact lens wearer. In addition, please fill out the enclosed paperwork and bring it with you.

We look forward to seeing you at your appointment and working with you to preserve your eyesight for many years to come.

Sincerely,

The Doctors and Staff of Boling Vision Center
